

CORE

Introduction to Regional Anaesthesia

Interested to learn core skills required to gain experience in Regional anaesthesia

One day practical course aimed at Core Anaesthetic Trainees.

The course is matched to the Basic Level Curriculum and incorporates practical workshops.

Topics include:

- Consent for Regional Anaesthesia including risk and benefits
- Ultrasound physics and 'knobology'
- Peripheral nerve stimulators and other equipment
- Needling technique
- Sonoanatomy of commonly performed basic blocks

Particularly useful for trainees working towards the Primary FRCA Exam.
