

CORE

Essential Pain Management (EPM)

Tailored to the needs of Core, ACCS, Trust doctors

This course covers essential topics relating to the Assessment & Management of Acute and Chronic Pain for Anaesthetists.

Ideal for those completing Stage 1 Top Up competencies and preparing for the Primary FRCA.

Covers the key learning outcomes within the Stage 1 Pain HALO as well as common MCQ and Viva topics.

Areas covered include:

- The Assessment of Pain
- Classification of Pain
- Pain Physiology and Pathology
- Pain Pharmacology and treatment
- RAT approach

There will also be a Case Based Discussion workshop where trainees will have an opportunity to complete CBDs to contribute to their stage 1 Pain HALO.
